

## CMSC 121 Activity 3 README

Submitted By: Andrei Ernest G. Martillo

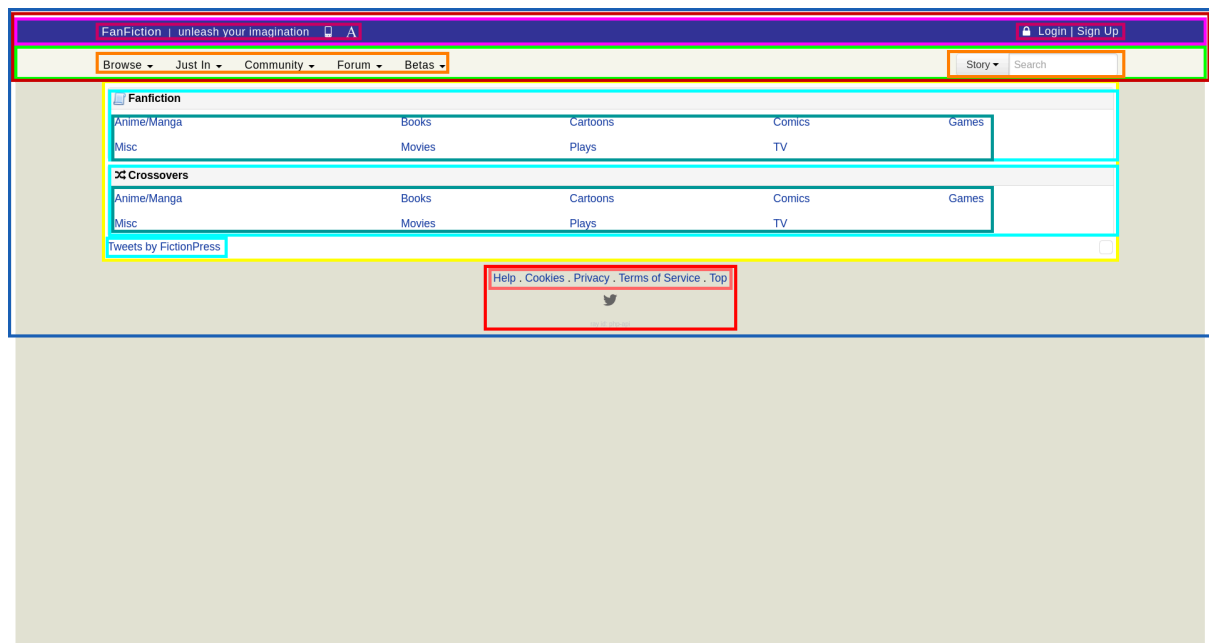

The website I chose was [fanfiction.net](https://www.fanfiction.net). There may be various discrepancies between how it would look if one opens it on a normal browser compared to how I did, but in general I just went to the website with Ad Blocking enabled (since that's how I visit these sites most of the time anyways) so a lot of ads are just not included here.

This is the original image of how the site looked like on my end:

This is the wireframe I made for the site:

[Click Here for Higher Res Image](#)

And the actual Recreated Website should generally look like this (at least it looks like this on my machine):
